EDUCATION

Green River College

Bachelor of Applied Science in Software Development

Seattle, WA

Expected June 2026

EXPERIENCE

Backend Engineer Intern

Jun 2025 – Sep 2025

Spotify

Remote

- Designed and developed scalable backend services using **Java**, **Spring Boot**, **Spring MVC**, and **SQL**, improving data retrieval and internal analytics workflows
- Optimized backend performance and reliability through design patterns, unit testing, and **code refactoring**, reducing production issues
- Collaborated with engineers and product stakeholders in **Agile sprint cycles** to deliver scalable backend solutions

Full-Stack Software Engineer Intern

Jan 2025 – May 2025

Green River College

Seattle, WA

- Developed full-stack web applications using **HTML**, **CSS**, **PHP**, and **MySQL**, improving internal tools and workflows
- Designed and optimized **database queries** and **backend logic**, enhancing application performance and scalability
- Built and maintained **RESTful APIs** to support dynamic data-driven features

Software Engineering Micro-Intern

Oct 2024 – Dec 2024

CodeDay

Seattle, WA

- Developed and maintained **JavaScript test suites** using **Mocha**, improving software reliability and code quality
- Debugged issues and optimized workflows in **Agile sprint environments**
- Delivered **production-ready contributions** successfully merged into the main codebase
- Collaborated with open-source maintainers through **GitHub pull requests and code reviews**

IT Operations Intern

Jun 2024 – Aug 2024

PACCAR Parts

Renton, WA

- Built a backend-driven **RAG chatbot** using **Python**, **REST APIs**, and **Azure OpenAI** to automate internal workflows
- Designed **data pipelines** for structured JSON data, improving system efficiency for 700+ users
- Integrated **Azure cloud** and **AI services** to enhance chatbot response accuracy and scalability

PROJECTS

Running Start Support Portal | React.js, Node.js, Express.js, MySQL, JWT

Present

- Built a **full-stack student support platform** used by students to access academic resources and FAQs
- Developed secure **REST APIs** and **JWT authentication** for admin workflows and content management
- Implemented scalable **MySQL database design** with **dynamic search**, **filtering**, and category-based navigation
- Collaborated with stakeholders using **Agile Scrum** methodologies to improve usability and accessibility

Salamander Tracker | React, Node.js, Java, Docker

June 2025

- Built a full-stack **video processing pipeline** for frame-level analysis and **centroid tracking**
- Developed custom image processing algorithms using **JavaCV** for low-contrast object detection
- Implemented **REST APIs** and **Docker-based backend services** for scalable video processing workflows

Ticket Assistant RAG App | Python, APIs, Azure OpenAI

June 2024

- Built a **Retrieval-Augmented Generation (RAG)** chatbot for internal workflow automation
- Designed **API-driven pipelines** and real-time response systems supporting **700+ users**

AI Student Support Chatbot | Azure Bot Service, Copilot

June 2024

- Developed an AI chatbot using **Azure Bot Service** and **Microsoft Copilot** to automate student support inquiries

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, PHP, HTML/CSS

Frameworks: Spring Boot, Spring MVC, React, Node.js, Express.js, Flask

Cloud & Tools: Docker, Git, Azure OpenAI, Azure AI Search, Google Cloud Platform

Concepts: REST APIs, JWT Authentication, Agile/Scrum

Testing & Libraries: JUnit, Pandas, NumPy, Matplotlib, JavaCV
