EDUCATION

Green River College

Bachelor of Applied Science in Software Development

Auburn, WA

June 2026

EXPERIENCE

Backend Engineer Intern

Jun 2025 – Sep 2025

Spotify

Remote

- Designed and developed scalable backend services using **Java**, **Spring Boot**, **Spring MVC**, and **SQL**, improving data retrieval and internal analytics workflows.
- Optimized backend performance and reliability through design patterns, unit testing, debugging, and code refactoring.
- Collaborated with engineers and product stakeholders in Agile sprint cycles to deliver scalable and maintainable software solutions.

Full-Stack Software Engineer Intern

Jan 2025 – May 2025

Green River College

Auburn, WA

- Developed full-stack web applications using **HTML**, **CSS**, **PHP**, **JavaScript**, and **MySQL** to improve internal tools and workflows.
- Designed and optimized database queries and backend functionality, improving application performance and scalability.
- Built and maintained RESTful APIs supporting dynamic data-driven features and user interactions.

Software Engineering Micro-Intern

Oct 2024 – Dec 2024

CodeDay

Seattle, WA

- Developed and maintained **JavaScript** test suites using **Mocha**, improving software reliability and code quality.
- Debugged issues and optimized workflows in Agile sprint environments.
- Delivered production-ready contributions successfully merged into the main codebase.
- Collaborated with open-source maintainers through **GitHub** pull requests and code reviews.

IT Operations Intern

Jun 2024 – Aug 2024

PACCAR Parts

Renton, WA

- Built an AI-powered RAG chatbot using **Python**, **REST APIs**, and **Azure OpenAI** to automate internal workflows.
- Designed and maintained data pipelines for structured JSON data, improving system efficiency for over 700 users.
- Integrated **Azure** cloud and AI services to improve chatbot response accuracy, scalability, and reliability.

PROJECTS

Tailored – AI Resume Tailoring & Job Application Platform | *Next.js, TypeScript, React, Prisma, PostgreSQL*

Present

- Built a full-stack platform for resume management, **AI-powered** resume tailoring, job scraping, and application tracking.
- Implemented authentication, Google/GitHub **OAuth**, encrypted API key storage, analytics dashboards, and application workflow management.
- Integrated AI-powered resume generation, **LinkedIn/Indeed** job scraping, and automated skill extraction workflows using **Apify** APIs.
- Built analytics dashboards, application tracking, search/filter functionality, notes, status tracking, and bulk management workflows.

Running Start Support Portal | *React.js, Node.js, Express.js, MySQL, JWT*

June 2025

- Built a full-stack student support platform used to access academic resources, FAQs, and support information.
- Developed secure **REST APIs** and **JWT** authentication for administrative workflows and content management.
- Implemented scalable **MySQL** database architecture with dynamic search, filtering, and category-based navigation.
- Collaborated with stakeholders using Agile Scrum methodologies to improve usability and accessibility.

Salamander Tracker | *React, Node.js, Java, Docker*

June 2024

- Built a full-stack video processing pipeline for frame-level analysis and centroid tracking.
- Developed custom image-processing algorithms using **JavaCV** for low-contrast object detection.
- Implemented **REST APIs** and **Docker**-based backend services for scalable video processing workflows.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, PHP, HTML/CSS

Frameworks: Spring Boot, Spring MVC, React, Next.js, Node.js, Express.js, Flask, Prisma

Databases: PostgreSQL, MySQL

Cloud & AI: Azure OpenAI, Azure AI Search, Google Cloud Platform, RAG

Tools: Docker, Git, GitHub, Postman

Concepts: REST APIs, OAuth, JWT Authentication, Agile/Scrum, Full-Stack Development, Backend Development
